

Now the grass can actually be greener on your own side

While a wide range of grasses is favored by livestock and fed to them, not all are nutritious or beneficial. **Rivashaa – Napier Grass CO (BN) 5** grass is a revolutionary green highly fortified Cumbu Napier grass, carefully selected to offer your livestock the best range of nutrients needed for their daily diet and growth. Fortified to be effective as adequate and all-round feed for all livestock, including cattle and even camels. We offer high-quality forage and silage, that is 100% natural. No preservative, no additive just high natural nutrient.

Parentage: Interspecific hybrid between Fodder Cumbu IP 20594 (Pennisetum glaucum) and Napier grass FD 437 (P. purpureum Schumach)

Benefits:

- 100% Eco-friendly high yield sustainable forage crop
- Highest crude protein aggregate
- Broader soft, lush green leaves
- More palatability because of succulent stems
- Rich in water-soluble carbohydrate
- Ideal DM (dry matter) content
- Easy digestibility to get essential nutrients
- The low indigestible crude fiber content
- Free from pests and fungus
- Assured availability in fresh loose form, shredded or as silage
- Assured year-round forage supply

Nature has given us the most organic of livestock feed, and we have improved it in the most organic way to put an end against any nutritional hazards imposed if any by other forages. Join the growing livestock owners using Napier **CO (BN) 5** to enjoy limitless benefits. The Choice is us, contact us NOW!

RIVASHAA[®]
THERE'S HOPE
